

Getting the "Goods" from the new and improved ...

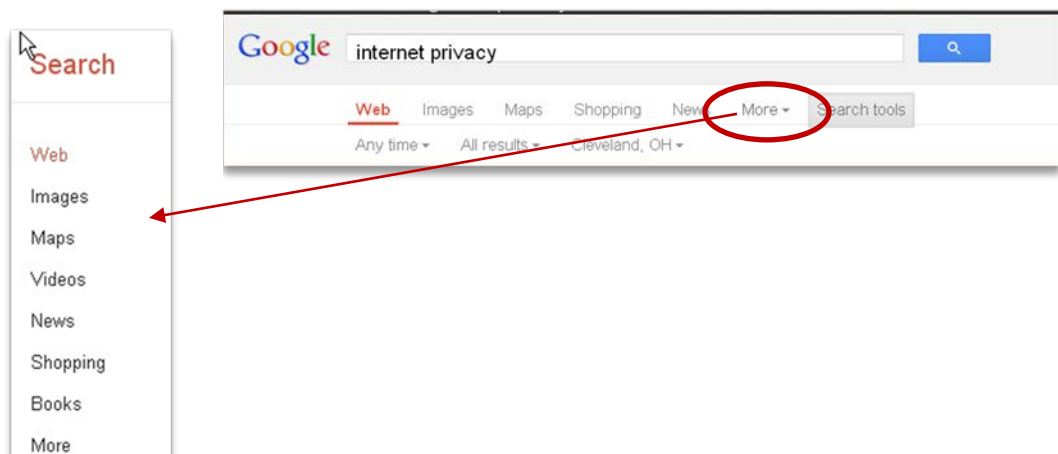

New Google Advanced Search Tools

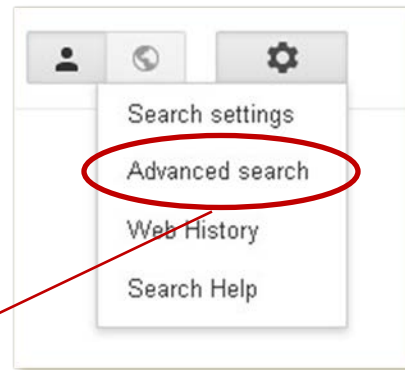

Google filters help you with every search. The options change based on your search. Here are a few that are available using the keyword search example, "Internet privacy."

There are options for filters specific to type of content. To make them available, click on "More".

The gear icon to the right of the search box is available after your initial search. The gear links to the Advanced Search features which include searching by reading level, file type, Creative Commons license, usage, or domain name such as .edu or .gov.

Then narrow your results by...

language:	any language	Find pages in the language you select.
region:	any region	Find pages published in a particular region.
last update:	anytime	Find pages updated within the time you specify.
site or domain:		Search one site (like wikipedia.org) or limit your results to a domain like .edu, .org or .gov
terms appearing:	anywhere in the page	Search for terms in the whole page, page title, or web address, or links to the page you're looking for.
SafeSearch:	Show most relevant results	Tell SafeSearch whether to filter sexually explicit content.
reading level:	no reading level displayed	Find pages at one reading level or just view the level info.
file type:	any format	Find pages in the format you prefer.
usage rights:	not filtered by license	Find pages you are free to use yourself.

Note: Another way to get to Google's Advanced search is to click on the link at the bottom of the page.
