

## **Getting Started for Students – Voki script**

Hi! I'm Jen. Glad you've found your way to the Research 4 Success home page. Let me tell you, this place got me through my last research paper. My social studies teacher assigned me this topic I totally never heard of before and I was wiggling out. You know the feeling. Anyway, I just took a deep breath took this course, and I got an A on that paper. You know what helped the most? Having the whole process laid out for me. I didn't have to waste time wondering how to get started and how to keep going. And now I have a system that will help in all my classes. Research projects still take work, but now I know just what to do. And you will too. Good luck!
