

The INFOhio Impact

Transforming Instruction · Impacting Learning

From an Educator's Perspective

Arnice Smith
Cincinnati Public Schools

I serve as the school librarian at my school, and I am a retired public librarian of 32 years. INFOhio ensures that all have equal access to high-quality materials regardless of their environments. INFOhio provides essential support needed by all students, parents, and teachers. Students of today are technology-driven so INFOhio allows me the flexibility to meet my K-6 graders where they are while introducing them to additional resources. I absolutely love BookFlix and so do my students. It is a wonderful tool to use during small group.

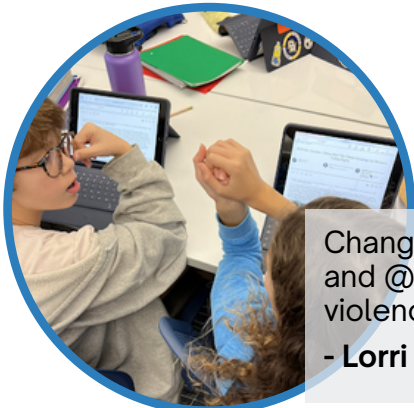

What Educators Say About INFOhio

WONDERFUL PD this morning with @MrsCarlsonMath! Cannot wait to use @infohio! #WEareLakota #WEchooseLakota #packpride @wolvstweet
- **Stacey Walsh, Occupational Therapist, Lakota Local Schools**

We love a good fall BookFlix story in Kindergarten! "Fletcher and the Falling Leaves" is always a hit! #ItsWorthIt #FallStories @infohio #Bookflix #LibraryLife
- **Kati Justus, Library Media Specialist, Worthington Schools**

Change Agents begin research today in the media center using @infohio and @GaleSchools databases! Research topics include reducing violence, women's rights, responsible consumption, and fighting hunger!
- **Lorri Kingan, Library Media Specialist, Hudson City Schools**

Real Classrooms. Real Stories.

Building Science Research Skills with INFOhio

Chagrin Falls Exempted Village Schools

At Chagrin Falls Exempted Village Schools, 7th grade science teacher, Alison Hinesman, uses INFOhio to build research skills in science class. In projects like Flat Scientist and March Mammal Madness tournament, students are successful because they learn how to use research databases to quickly access the material they need while finding a variety of material from INFOhio.

Favorite Resources from an INFOhio ICoach

Akron City Schools

Annette Culp, a Library Media Specialist who works for Akron City Schools at an International Baccalaureate (IB) Primary Years Programme (PYP) school, assists students when they need to find information for exhibition topics. For staff that focus on specific units of inquiry, like "Sharing the Planet," Annette shares INFOhio's Explora. "This was a great unit where students found different animals as a feature to spotlight and shared their findings with their teacher via email and writing," she noted.

"I enjoy being an ICoach. Being able to say, 'Did you know...?' as a leading question always opens the floor to engage and share out INFOhio resources."

Preparing for the Workforce with INFOhio

Monroe Local Schools

Zachary Stock's first grade students at Monroe Local Schools prepare for the workforce by learning about goods and services. Students used World Book Early Learning to learn about different careers. World Book Early Learning is the perfect tool for emergent readers to explore independently or learn with an adult.
