## Exploring Eclipses

### Begin Your Journey Here

- ★ Working with a parent, sibling, grownup, or friend follow the directions in each circle.
- ★ After you complete the activity, share what you learned with a parent, sibling, grownup, or friend.
- ★ Challenge yourself to complete all the activities by traveling “the universe”!

### Activities for parents and caregivers engaging kids in accelerated learning.

#### There is more than one type of eclipse!

Learn what they are in the eBook [Exploring Eclipses](#) written by Jill Sherman.

#### Build the solar system based on the diameter of the sun!

[Discover](#) how the size of the sun determines the size of the solar system.

#### Discover how much you'd weigh on other planets!

[Type in your weight](#) to see how gravitational pull affects it across the solar system.

#### The universe is an amazing place!

[Read about the Milky Way and watch videos](#) on our galaxy and solar system.

#### Explore space and its mysteries!

[Learn the science](#) behind space exploration.

#### Learn more about solar eclipses!

[Go on a quest](#) to learn more about solar eclipses.

#### Recreate solar eclipses at home!

Use common household items to recreate solar and lunar eclipses at home with [this activity](#).

#### Watch the magic of a solar eclipse!

Discover the step-by-step events that cause an eclipse in [this short video](#).

#### But wait... there's more to learn!

Control the sun and [create an eclipse](#).

Access each activity online by scanning the QR code or typing [bit.ly/solareclipse-flyer](http://bit.ly/solareclipse-flyer) in your browser. Then click each circle to go to the activity's resource.
