

# Experience BLUEcloud

A next-generation library services platform in a cloud-based environment.

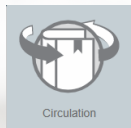

The BLUEcloud Suite supports your library with a clean, modern interface that works effectively providing you with more time to help students and teachers discover your school library and INFOhio resources. Access all of your BLUEcloud products through INFOhio.

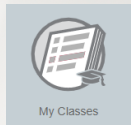

#### BLUEcloud Cataloging

Compare records side-by-side, drag and drop tags, and replace entire records. Search your local library catalog and OCLC, Library of Congress, INFOhio, and BLUEcloud MARC databases.

#### BLUEcloud Circulation

Shift quickly between patron search and catalog search. Check in, check out, view and pay bills, place holds, manage transits, and print receipts.

#### BLUEcloud Course Lists

Work with teachers to support student learning with lists of quality resources. Promote your library's resources, incorporate teacher vetted materials, and link to safe, quality, digital resources.

#### ISearch

Search nearly all INFOhio digital collections and access the resources from your school library.

#### MobileStaff

Take your library to the classroom using the self-service kiosk mode. Circulate materials when internet access is unavailable. Weed and inventory your collection in a fraction of the time.

BLUEcloud Central, a browser-based hub for BLUEcloud, allows library staff to choose the features and functions that best meet their needs. Using the same Symphony database as traditional products like WorkFlows, any change made in one interface will appear in the others. WorkFlows and BLUEcloud can be used simultaneously, allowing library staff to learn at their own pace and choose when to fully transition to BLUEcloud Central.

**Contact your regional ITC to experience BLUEcloud today!**
